

Meeting Notes
October 29, 2021
Delaware Township Community Center

We are grateful for yet another great turnout to give local nonprofits the opportunity to collaborate and network. A big focus of this meeting was about data.

One of the priority areas for the Fishers Nonprofit Coalition is data. While we continue to fine tune our data sources and bring in additional data about our community, citizens, and organizations, we wanted everyone to get used to seeing the data in a dashboard environment. Most recently we have added new federal estimates, and data/analyses from the Fishers Wellness survey. It will be good for you and your teams to look through the data, and in the wellness results using the filters to see what surprises you. We will continue to look at data to best inform our nonprofits on programming, service needs and collective impact.
